## MLT MCQS

- **RRB - LA / LS**
- **AIIMS - JLT/SLT**
- **PGIMER Chandigarh**
- **MHSRB Telangana**

# Target MLT

The transmission of infection from the mother to the fetus through placenta is termed-

- A. Iatrogenic
- B. Teratogenic
- C. Nosocomial
- D. Vertical

# Target MLT

Which hormone is released from zona glomerulosa?

- A. Oestrogen
- B. Aldosterone
- C. Adrenalin
- D. Cortisol

## Adrenal Cortex

The adrenal cortex can be divided into three layers-

1. Zona reticularis (inner layer)
2. Zona fasciculata (middle layer)
3. Zona glomerulosa (outer layer).

The adrenal cortex secretes many hormones, commonly called as **corticoids**

The corticoids involved in carbohydrate metabolism - glucocorticoids.

**Cortisol** is the main glucocorticoid.

Corticoids which regulate the balance of water /electrolytes - mineralocorticoids.

**Aldosterone** is the main mineralocorticoid in our body

# Target MLT

Which of the following terms indicates bluish discolouration of the skin

- A. Erythema
- B. Jaundice
- C. Cyanosis
- D. Pallor

# Target MLT

Renin is a \_\_\_\_\_ produced by the \_\_\_\_\_

- A. Hormone, liver
- B. Hormone, kidney
- C. Enzyme, liver
- D. Enzyme, kidney

# Target MLT

Endometrium of the pregnant uterus is known as-

- A. Decidua
- B. Trophoblast
- C. Amnion
- D. Chorion

# Target MLT

**Malaria is spread by the bite of which mosquito-**

- A. Female anopheles.**
- B. Male anopheles.**
- C. Aedes**
- D. Culex**

# Target MLT

Automatic tissue processing machine is called-

- A. Microtome
- B. Histokinete
- C. Cryostat
- D. Coulter counter

# Target MLT

Which blood component is compulsory for blood coagulation?

- A. RBC
- B. WBC
- C. Platelets
- D. Lymphocytes

# Target MLT

The main product of protein metabolism is-

- A. Iodine
- B. Urea
- C. Carbohydrate
- D. Glycogen

# Target MLT

Which electrolyte helpful in blood clotting?

- A. Na
- B. K
- C. Ca
- D. Phosphorus

# Target MLT

**What is the full form of ELISA?**

- A. Enzyme lysis immune solution activity**
- B. Enzyme linked immune sorbent assay**
- C. Enzyme linked integrated solution activity**
- D. Enzyme lysis immune solution assay**

# Target MLT

Removing of calcium from tissue is called-

- A. Hypocalcaemia
- B. Decalcification
- C. Clearing
- D. Embedding

# Target MLT

The most commonly used embedding media is-

- A. Paraffin wax
- B. Celloidin
- C. Gelatin
- D. Resin

# Target MLT

The size of red blood cell is measured by-

- A. PCV
- B. MCV
- C. MCH
- D. MCHC

# Target MLT

Reticulocyte is specially stain by which stain-

- A. H & E stain
- B. Congo red
- C. Brilliant cresyl blue
- D. PAS stain
